ABOUT THIS DOCUMENT

This profile is organized as a single continuous journey — starting with the people behind New Syed Pharma, moving through our story and standards, walking the full length of our Muridke production floor, and closing with our complete catalogue of herbal and veterinary formulations.

## A WORD FROM OUR LEADERSHIP

## Founder's Message

New Syed Pharma was founded on a simple idea: bring the wisdom of traditional herbal medicine to modern Pakistani households and farms, without ever compromising on quality or trust.

That idea has grown into a 12-department facility at Muridke, two dedicated product divisions, and a network of more than 100 distributors and partners across the country — built one carefully tested batch at a time.

None of it would have been possible without the discipline of our production and quality teams, and the confidence our partners and customers have placed in us since day one. That trust is what we work to earn again with every product that leaves our facility.

*Dr. Zaffar*

CHIEF EXECUTIVE OFFICER, NEW SYED PHARMA

### Quality Oversight

Personally involved in setting the standards our QC and QA teams work to every day.

### Team Development

Focused on building a disciplined, well-trained production and quality workforce.

### Regulatory Compliance

Ensures every formulation is properly documented and registered before release.

## OUR STORY

## A trusted beginning

New Syed Pharma started with a straightforward vision: manufacture herbal and veterinary products with the same discipline and professional standards as any modern pharmaceutical company — no shortcuts, no compromises.

That vision became a facility. Steady, deliberate growth — built on operational excellence rather than shortcuts — turned a single production line into a fully departmentalized manufacturing site with its own quality control and quality assurance teams.

Today, New Syed Pharma continues to build toward becoming a trusted name in herbal and veterinary healthcare across Pakistan and beyond.

### 01 **Trusted Beginning**

Started with a vision for reliable herbal products made with care and professional standards.

### 02 **Quality Growth**

Built a strong foundation through dedication and operational excellence.

### 03 **Future Vision**

Growing toward becoming a trusted name in herbal healthcare across Pakistan and beyond.

A MILESTONE WORTH CELEBRATING

## Our Grand Opening

Moments from the inauguration of our Muridke facility — the beginning of New Syed Pharma's manufacturing journey, celebrated together with our team and partners.

## WHAT DRIVES US

# Vision & Mission

## *Vision*

To become a trusted name in herbal and veterinary healthcare across Pakistan and beyond — known as much for consistency as for the natural ingredients behind every formulation.

## *Mission*

To manufacture herbal and veterinary products under strict quality and hygiene standards, and make them accessible to families and farms through a growing nationwide distribution network.

## HOW WE DELIVER ON IT

## Our Commitments

01

### **Ingredient Integrity**

Every raw material is verified before it enters our production floor, with nothing substituted or shortcut.

02

### **Batch Traceability**

Every batch can be traced from raw material intake through to final dispatch.

03

### **Nationwide Access**

A growing distributor network and online store keep our products within reach across the country.

04

### **Continuous Improvement**

Standards are reviewed and tightened as the facility and product range grow.

OUR TAGLINE, LIVED DAILY

# Quality • Trust • Care

Three words sit under our logo on every product we make. They aren't a slogan we chose for its sound — they describe how the facility actually runs, department by department.

01

## Quality

Every batch is tested for purity, consistency, and safety before release — nothing reaches a shelf without passing our QC lab.

02

## Trust

From documentation to dispatch, our QA team keeps every step traceable, compliant, and accountable.

03

## Care

Behind every formulation is a commitment to the families and farmers who depend on it working, every time.

04

## Access

Two dedicated divisions and a growing distributor network keep our products within reach across Pakistan.

*"Quality, Trust, Care isn't just printed under our logo — it's the standard every department in this profile is built to meet."*

OUR PROCESS AT A GLANCE

# By The Numbers

A snapshot of the scale behind New Syed Pharma today — the product of steady, deliberate growth since our Muridke facility first opened.

500+

PRODUCTION & QC DEPARTMENTS

## Herbal Division

Natural tonics, syrups & wellness formulations for everyday family health.

## Veterinary Division

Nutraceutical powders & syrups for livestock health and productivity.

## 100% Batch-Checked

Every single batch passes through our Quality Control lab before release.

NOW THAT YOU'VE SEEN HOW IT'S MADE

## Our Divisions & Online Store

Every product we manufacture is available through one of our two divisions, or our online store — with nationwide delivery and simple WhatsApp ordering.

### HERBAL

#### Herbal Division

Natural tonics, syrups & wellness formulations for everyday family health — including FerBex, Alica Plus, Afiron, Vlex, and Apiserv.

[newsyedpharma.com/herbal-products](https://newsyedpharma.com/herbal-products)

### VETERINARY

#### Veterinary Division

Nutraceutical powders & syrups formulated for livestock health and productivity.

[newsyedpharma.com/veterinary-products](https://newsyedpharma.com/veterinary-products)

### STORE

#### Online Store

Browse and order directly online — secure checkout with delivery across Pakistan.

[newsyedpharma.com/shop](https://newsyedpharma.com/shop)

#### Nationwide Delivery

Every order, from either division, ships across Pakistan.

#### WhatsApp Ordering

Order directly through WhatsApp at +92-325-0032222.

#### GMP-Aligned Facility

Every product ships from our own certified Muridke production floor.

## CERTIFIED &amp; TRUSTED

## Safety is a priority, quality is the standard

Every department in this profile operates under strict hygiene and quality protocols, in a GMP-aligned facility, backed by official regulatory documentation — including Form 6 and Form 7 registration — and ongoing compliance with Pakistan's health authorities.

- ✓ Hygiene & gowning protocols enforced at facility entry
- ✓ Raw material verification before production intake
- ✓ Form 6 & Form 7 regulatory registration on file
- ✓ Batch-level documentation retained for traceability
- ✓ Ongoing compliance with Pakistan's health authorities

INSIDE OUR FACILITY

# Twelve Departments. One Standard.

Follow the same path every raw ingredient takes — from entry and gowning, through mixing, manufacturing, and testing, to the finished product ready for dispatch.

THE FULL TOUR

- 01 Entry & Gowning Area
- 02 Raw Material Store
- 03 Liquid Manufacturing & Mixing
- 04 Packing Hall
- 05 Quality Control Lab
- 06 QC Documentation Library
- 07 Stability Testing & In-Process Lab
- 08 QA Administration Office
- 09 Tablet Manufacturing
- 10 Finished Goods & Dispatch
- 11 Bulk Storage Warehouse
- 12 Powder Section

01

## Entry & Gowning Area

Every visit to our production floor begins here. Staff and visitors change into clean, controlled gowning before entering — the first step in maintaining hygiene standards throughout the facility.

**STANDARD PRACTICE** — Gowning is mandatory for every staff member and visitor, every single shift — no exceptions.

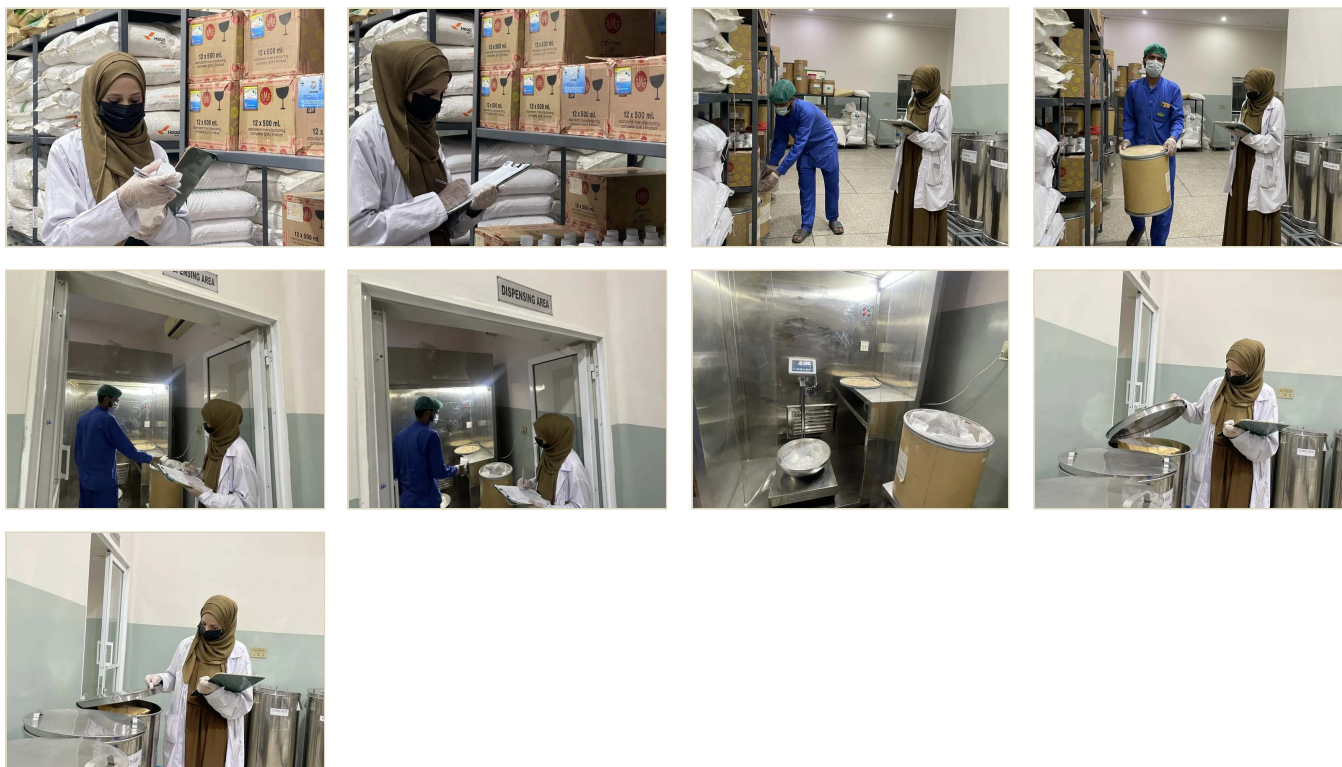

## 02

## Raw Material Store

Every formulation starts with carefully sourced, verified raw materials. Our storage area keeps ingredients organized, labeled, and protected until they're ready for production.

**STANDARD PRACTICE** – Incoming materials are checked against supplier documentation before being logged into inventory and released to production.

03

## Liquid Manufacturing & Mixing

This is where our herbal syrups and tonics come together — precise mixing and filling processes ensure every bottle meets the same trusted formulation, batch after batch.

**STANDARD PRACTICE** — Mixing tanks are cleaned and inspected between batches to prevent cross-contamination.

04

## Packing Hall

Once manufactured, products move to our packing hall for labeling, boxing, and final quality checks before they're prepared for distribution across Pakistan.

**STANDARD PRACTICE** – Each pack is visually inspected before sealing, and random samples are pulled for a final quality check.

05

## Quality Control Lab

Our Quality Control lab tests every batch for purity, consistency, and safety — including precise weighing and pH testing — before any product is approved for release.

**STANDARD PRACTICE** — Every test result is logged against the product's original specification sheet before a batch is cleared for release.

06

## QC Documentation Library

Our team references official pharmacopoeia standards to verify every formulation and test method against recognized industry benchmarks.

**STANDARD PRACTICE** – Reference standards are kept up to date as pharmacopoeia guidelines are revised.

07

## Stability Testing & In-Process Lab

Stability chambers monitor how our products perform over time under controlled temperature and humidity — ensuring shelf life and effectiveness are never compromised.

**STANDARD PRACTICE** — Samples are checked at fixed intervals to confirm shelf life holds under real storage conditions.

08

## QA Administration Office

Behind every approved batch is a dedicated Quality Assurance team overseeing documentation, compliance, and coordination across the entire production process.

**STANDARD PRACTICE** – The QA team signs off on every batch record before it moves on to dispatch.

09

## Tablet Manufacturing

Our tablet section handles granulation and tablet production, turning carefully measured herbal formulations into consistent, ready-to-package tablets.

**STANDARD PRACTICE** – Granulation parameters are monitored closely to keep tablet weight and hardness consistent, batch after batch.

10

## Finished Goods & Dispatch

Completed, quality-approved products are organized here, ready for dispatch to distributors, pharmacies, and customers across Pakistan.

**STANDARD PRACTICE** – Every outgoing shipment is cross-checked against distributor orders before it leaves the facility.

11

## Bulk Storage Warehouse

Our bulk warehouse supports larger-scale storage needs, keeping production supplied and distribution running smoothly.

**STANDARD PRACTICE** – Stock levels are monitored to keep production supplied without overstocking sensitive materials.

12

## Powder Section

Our dedicated powder section handles the filling and packaging of dry powder formulations, maintained under the same strict hygiene standards as the rest of the facility.

**STANDARD PRACTICE** – Powder fill weights are spot-checked throughout the run to stay within specification.

THE FULL RANGE
